PROJECTS

1.   College Tracking System - The proposed system aims to significantly enhance the college tracking experience by addressing key shortcomings in the existing system.
Technology – HTML, CSS, BOOTSTRAP,JAVASCRIPT

2.   Mobile Sphere - A mobile management system is needed because there are lots of different mobile devices at work, and we need a way to control and organize them in one place. It helps keep our data safe and follows the rules.
 Technology – API ,BOOTSTRAP ,HTML,CSS,PHP

3.   Trackify - Is a real-time delivery tracking system built with React.js for the frontend and Spring Boot with MySQL for the backend. It integrates the Google Maps API for tracking, WebSockets for real-time updates, and Firebase for notifications. The project also features payment processing with validation and a user-friendly interface.
